FREE LEDS[#]

**PURCHASE \$500 OF NECO LEDS AND
REPAY OVER 12 MONTHS WITH THE SAVINGS***

LEDs are effectively free after 12 months as the saving from installing the LEDs may be greater than the running costs of a 50 watt halogen downlight under certain conditions. See back for details.

* No deposit, no interest for 12 months. To approved applicants only. Terms, conditions, fees and charges apply. Interest is payable on any balance outstanding after the interest free period. Monthly repayments apply. Finance provided by Once Credit Pty Limited ACN 112 319 632 t/a MyBuy.

INTRODUCING NECO LEDS

SAME LIGHT AS HALOGEN, FRACTION OF THE ENERGY

- 85% less energy than halogen
- Available in MR16 and GU10
- Bright, warm white colour
- Reduce carbon emissions
- Lamp life of 35,000 hours
- Cooler than a halogen
- Safe for insulation
- High output 6 watt LED, 350 lumens
- Ideal for retrofits - no electrician req.
- Compatible with most transformers
- 12 month replacement warranty
- 14-day money back guarantee
- Installation service available
- Meets Australian Standards

USE THE SAVINGS TO REPAY OVER 12 MONTHS[#]

INTEREST FREE TO APPROVED CUSTOMERS

A 50 watt halogen lamp operating for 5 hours a day will cost \$21.82 per year in electricity (assuming a tariff of \$0.23 kWh). After 1 year or 2,000 hours, the lamp will need replacing at a cost of \$11.95, bringing the total cost over 12 months to \$33.77.

Under the same assumptions, a Neco LED will cost \$3.35 per year in electricity. After including the purchase price of \$29.95, the total cost over 12 months is \$33.30 - less than the halogen. After 12 months, the Neco LED will save you \$30.42 every year. After 5 years, the Neco LED will have saved you \$122 per lamp. Multiply this by a house or business full of downlights, and the savings are substantial.

COMPARE THE COSTS

Neco LEDS will save you money and reduce your carbon emissions. How much could you save?
