

NECO MAINTENANCE PLAN

SOLAR POWER MAINTENANCE

We all know the importance and benefits of regularly servicing a vehicle. Failure to service a vehicle can result in costly repairs, and even reduce the vehicle's life.

Likewise, your solar power system needs regular maintenance to ensure it performs at its best. The Neco Maintenance Plan is an affordable and hassle-free way to keep on top of your system maintenance, while extending your warranty. For just \$150* a year it's money well spent.

Your first maintenance check is free and will take place around 12 months after the date of installation. You can book a maintenance check at any time by calling us on 1300 882 640.

MAINTENANCE CHECK

Your annual Neco Maintenance Check-Up includes:

- Professional cleaning of the solar panels
- Review of shading near the solar panels
- Inspection of electrical systems and connections
- Full safety inspection, including stickers

The maintenance plan also includes the replacement of any defective seals, clamps, conduit, stickers and any items covered under warranty. And for every year that you have a maintenance check-up, Neco will increase the manufacturer's materials and workmanship warranty up to a maximum of 10 years.
